12TH BIOLOGY · CHAPTER 21 · CHAPTER TEST

Immunity

Chapter-wise test: 6 MCQs, 5 of 6 short questions, 1 long question

Class: 12th (HSSC Part II)	**Subject:** Biology	**Total Marks:** 26
Chapter: 21	**Time Allowed:** 45 minutes	**Name:** _____

OBJECTIVE PART (6 × 1 = 6)

Q.1 Choose the correct answer.

1. Which of these is not involved in body's non-specific defence?

(a) Natural killer cells (b) Inflammatory response
(c) Complement system (d) Antibodies

2. The proteins released by natural killer cells are:

(a) Interferons (b) Perforins
(c) Pyrogens (d) Histamines

3. Which type of white blood cell is responsible for producing antibodies?

(a) B lymphocytes (B cells) (b) Neutrophils
(c) Macrophages (d) Natural killer cells

4. T cells mature in the:

(a) Spleen (b) Bone marrow
(c) Thymus (d) Liver

5. Pyrogens act on the:

(a) Thymus (b) Hypothalamus
(c) Cerebellum (d) Liver

6. Skin offers an impenetrable barrier to microbes. It is categorized as:

(a) Specific defence (b) Acquired immunity
(c) Non-specific defence (d) Passive immunity

SUBJECTIVE PART — SHORT QUESTIONS (5 × 2 = 10)

Q.2 Write short answers to any FIVE (5) questions.

i. Skin is an important component of our defence system. Comment.
ii. How do natural killer cells play a role in the body's defence?
iii. Define pyrogens and state their effect on the hypothalamus.
iv. Differentiate between active and passive immunity.
v. What do you mean by autoimmune diseases?
vi. What are monoclonal antibodies?

LONG QUESTION (2 × 5 = 10)

Q.3 Answer both parts.

(a) Describe the role of T-cells in cell-mediated immunity.
(b) Define allergies. How are their symptoms related to the release of histamines?
