English • Priorities, plot and cohesive writing

The Value of Time

Official activities • Conjunctions • Story writing • Includes solved Review 1 (Units 1–6)

Unit 6 • Complete official activities • Includes Review 1 (Units 1–6)

Story at a glance

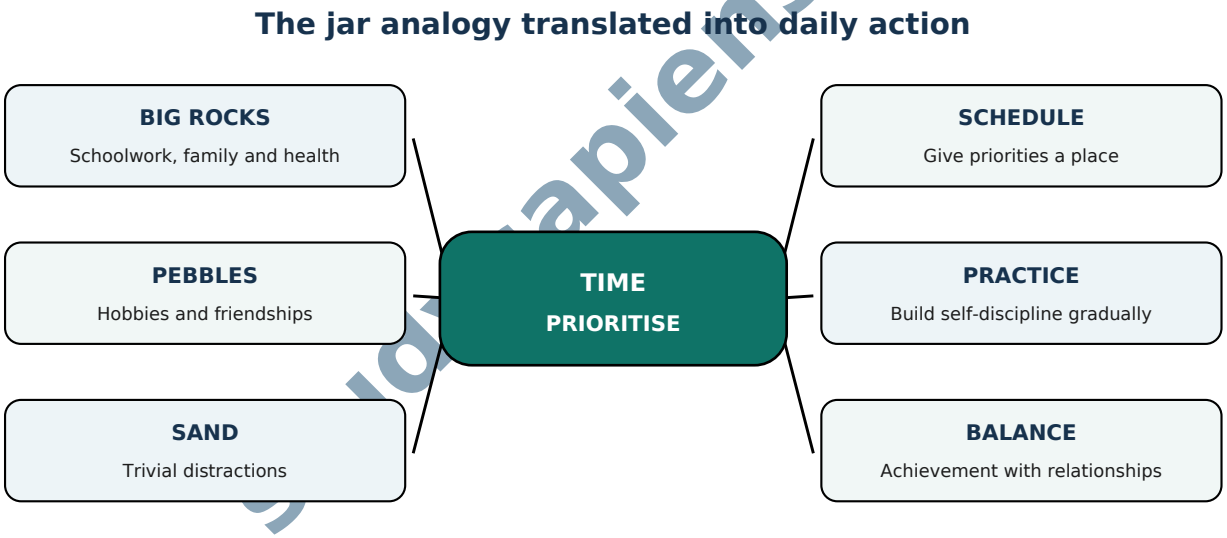

• **Central idea:** Time is used wisely when important responsibilities receive attention before smaller pleasures and trivial distractions.

• **Jar analogy:** Big rocks represent schoolwork, family and health; pebbles represent other priorities such as hobbies and friendships; sand represents small, trivial activities.

• **Character development:** Taseer changes from a cheerful but habitual procrastinator into a reliable, balanced and successful person through guidance, practice and determination.

• **Language focus:** Plot, viewpoint, context vocabulary, conjunctions, transitions and story writing.

Figure 1 — Original priority map based on the story's jar analogy

Main idea in the centre → supporting details → examples → a clear concluding sentence

Important: The official Review 1 for Units 1–6 is included in full near the end of this PDF, preserving the requested one-PDF-per-unit package structure.

Pre-Reading: My Daily Routine

Model activity list and realistic schedule

• **06:30:** Wake up, get ready and eat breakfast • **07:30–14:00:** Attend classes, including lunch break • **14:30:** Lunch and short rest • **15:30–17:00:** Homework and revision • **17:00–18:00:** Sports or another extracurricular activity • **18:00–19:00:** Free time • **19:30:** Dinner and family time • **20:30:** Reading and preparation for bed • **22:00:** Sleep.

1. Do you spend too much or too little time on any activities?

Model reflection: I sometimes spend too much time on unplanned video or phone use and too little on spaced revision. The schedule makes this visible by giving recreation a defined place rather than allowing it to displace homework, sleep or family responsibilities.

2. Which activities deserve more time?

I would give more time to reading, exercise and regular review of difficult subjects. These activities support long-term learning and health. I would not remove all free time; balanced relaxation helps me return to demanding tasks with better concentration.

3. What can you change to manage time better?

I can prepare a short priority list each evening, keep my phone outside the study area, work in focused intervals and complete the most difficult school task before entertainment. A weekly review will show whether the plan is realistic and which adjustments are needed.

While-reading margin questions. Quick answers in story order.

Question	Answer
What are Taseer’s positive qualities?	He is cheerful and kind-hearted, and he is adored by others.
How did his teachers and parents feel?	His teachers were greatly concerned, and his parents were perpetually worried about rushed assignments, incomplete tasks and his refusal to change.
What lesson did the jar teach?	Place the big rocks—important responsibilities—first; then fit pebbles and sand around them. Trivial activities must not consume time needed for major priorities.

studysapiens.com

Concise story summary

• Taseer was kind and cheerful but wasted time on games, chatting and daydreaming while work accumulated. His grandfather demonstrated that sand and pebbles placed first prevent big rocks from fitting into a jar, whereas rocks placed first leave spaces for the rest. He explained the analogy and helped Taseer schedule schoolwork, chores, family, hobbies and relaxation. Change was initially difficult, but practice improved Taseer's grades, reduced stress and strengthened relationships. He later shared the lesson with classmates and continued to live by it.

Reading and Critical Thinking

A. Answer the following questions.

1. How had Taseer wasted time before visiting his grandfather?

He spent hours on video games, chatting with friends and daydreaming. He procrastinated even though he had good intentions, allowing schoolwork and chores to accumulate instead of giving them planned time.

2. How did poor time management affect his performance?

He repeatedly ran out of time, rushed assignments and left tasks incomplete. This worried his teachers and parents and prevented his pleasant nature and good intentions from becoming reliable achievement. The later improvement in grades confirms that unmanaged time had harmed his academic work.

3. How did Taseer fill the jar?

On his first attempt, he poured in sand, then pebbles, and finally tried to add the big rocks; they did not fit. His grandfather reversed the order: big rocks first, pebbles in the spaces between them, and sand last in the remaining gaps. Everything then fitted.

4. Why did his grandfather decide to help him?

The wise grandfather noticed Taseer's continuing struggle and wanted to teach him a memorable lesson rather than merely criticize him. He specially invited Taseer, used a concrete demonstration and helped him create a practical schedule so that understanding could become changed behaviour.

5. What was the impact of accurate time management on Taseer's performance?

He gained control of his time, felt less stress about deadlines and improved his grades. He also found more time for family and friends, became more reliable and earned his parents' pride. The change therefore improved both achievement and relationships, leading to a balanced, fulfilling life.

studysapiens.com

B–C. Plot development: discuss and complete the diagram.

Plot element	Events and contribution to theme
Exposition	Taseer is introduced as cheerful and kind but extremely poor at managing time. His procrastination creates the central conflict and establishes the need for growth.
Rising action	His grandfather invites him, asks him to fill the jar and demonstrates the successful order. The failed first attempt creates curiosity, while the explanation connects the objects with life priorities.
Climax / turning point	Taseer understands the jar's meaning and accepts a schedule based on major priorities. This new perspective makes genuine change possible.
Falling action	He initially struggles with immediate gratification but keeps practising. His deadlines, grades, confidence and relationships gradually improve, and he shares the method with classmates.
Resolution	He becomes a master of time management and grows into a successful, happy individual who always makes time for what matters. The story closes by affirming responsibility, balance and wise priorities.

studysapiens.com

Viewpoint analysis. How do different characters' perspectives deepen the story?

Taseer initially sees distractions as immediate pleasure and later understands their cost. His teachers and parents view the same behaviour through concern about work and welfare. His grandfather sees a solvable habit and offers patient guidance, while classmates respond to his later experience as a useful example. These contrasting viewpoints move the narrative from problem to instruction, change and shared learning.

Vocabulary and Working with Words

A. Explain the highlighted words in context.

Word	Contextual meaning
procrastinating	delaying or postponing tasks that should be done
impart	communicate or pass on knowledge, wisdom or a lesson
eagerly	with keen interest, enthusiasm or impatience to begin
intently	with full attention and concentration
approach	a particular method or way of dealing with a task
determination	firmness of purpose; continuing despite difficulty
impact	a strong effect or influence on someone or something

B. Thesaurus synonyms and original sentences.

Word / synonym	Model sentence
engrossed — absorbed	I was so absorbed in the novel that I missed the announcement.
admirable — commendable	Her commendable honesty strengthened the team’s trust.
frowned — scowled	He scowled when the noisy interruption broke his concentration.
amazement — astonishment	To our astonishment, every object fitted into the jar.
allocated — assigned	The teacher assigned thirty minutes to group discussion.
impact — effect	A regular routine had a positive effect on my sleep.
cherished — treasured	She treasured the advice her grandmother had given her.

studysapiens.com

C. Change nouns to adjectives.

Noun	Adjective	Example
nature	natural	natural beauty
management	managerial	managerial skills
struggle	struggling	a struggling reader
gratification	gratifying / gratified	a gratifying result; a gratified student
expression	expressive	an expressive voice
reaction	reactive	a reactive response
presence	present	every student present
lesson	instructional (related adjective)	an instructional activity
progress	progressive	progressive improvement

Word-formation note: *Gratifying* describes what causes pleasure; *gratified* describes the person who feels it. English has no common direct adjectival derivative of *lesson*; *instructional* gives the related meaning, while *lesson* itself can modify a noun in “lesson plan”.

Grammar: Conjunctions and Transitions

Class	Function and examples
Co-ordinating	Join equal words, phrases or independent clauses: **for, and, nor, but, or, yet, so** (FANBOYS).
Subordinating	Connect a dependent clause to an independent clause: **because, although, if, unless, since, while, before**.
Correlative	Work in pairs: **both/and, either/or, neither/nor, not only/but also, whether/or**.
Transitions	Show addition, contrast, time, cause or result across sentences and paragraphs: **moreover, meanwhile, therefore, in addition, furthermore**.

A. Fill in appropriate co-ordinating conjunctions.

1. I wanted to go for a walk, **but** it started raining.

2. She likes both burger **and** pizza.

3. You can have nihari **or** pasta, but not both.

4. He studied hard, **so** he could pass the exam.

5. They were tired, **but** they kept working.

B. Use subordinating and correlative conjunctions.

1. He didn't submit the homework **because** he wasted time playing games.

2. She likes **either** tea **or** juices in the morning.

3. Kiran didn't pass the exam **because** she had not studied well.

4. Although he was tired, he stayed up late to finish his work.

5. Unless you work hard, you won't pass the test.

6. He is **not only** intelligent **but also** hardworking. (Also correct: **both** intelligent **and** hardworking.)

C. Complete with and, but, or or so.

1. She likes tea **and** coffee.

2. He went to the store **and** bought some milk.

3. They played outside, **but** it started raining.

4. It was late, **so** they decided to leave early.

5. She enjoys reading novels **and** watching video lectures.

6. He is not tall **or** short.

7. They will visit the museum **or** the zoo.

Item 4 takes **so** as the expected connector. For clearer everyday logic, the sentence could be revised to "It was late, so they decided to leave immediately."

D. Use the transition words in original sentences.

1. Moreover: The plan saves time; moreover, it reduces unnecessary stress.

2. Meanwhile: I completed my homework; meanwhile, my brother prepared dinner.

3. Therefore: The bus was delayed; therefore, we informed our teacher.

4. In addition: She manages a small business; in addition, she mentors two students.

5. Furthermore: The evidence supports his claim; furthermore, it answers the main objection.

E. Rewrite with a different conjunction while preserving meaning.

Original	Rewritten sentence
She likes coffee, but she doesn't like tea.	Although she likes coffee, she doesn't like tea.

studysapiens.com

Original	Rewritten sentence
They went for a walk because the weather was nice.	They went for a walk since the weather was nice.
He not only studies but also plays.	He both studies and plays.
They went skiing since there was fresh snow.	They went skiing because there was fresh snow on the slopes.
He is both a talented musician and a skilled painter.	He is not only a talented musician but also a skilled painter.

Oral Communication Skills

1. How would the story change without the grandfather's intervention?

Taseer's rushed work and incomplete tasks would probably continue, increasing stress and damaging his parents' and teachers' trust. He might eventually learn through a different experience, but the story would lose its central demonstration, guiding relationship and clear turning point. The resolution would therefore be less hopeful and less instructive.

2. How does the jar analogy reflect priorities beyond time management?

It can guide money, energy and attention as well as time. Essential needs, health, relationships and long-term duties deserve resources before optional purchases or trivial distractions. The analogy also shows that smaller activities are not necessarily worthless; they need an appropriate place after major commitments rather than control over the whole plan.

3. Can prioritising "big rocks" become limited or problematic?

Yes. People may label only academic or paid work as important and neglect rest, friendship or health, although these also sustain a balanced life. Emergencies can make a small-looking task urgent, and an overloaded jar may require removing commitments rather than fitting everything in. Priorities should therefore be reviewed realistically, with wellbeing and flexibility included.

Writing Skills: An Original Story

Story elements and planning. Setting + characters + plot + conflict + resolution + theme.

Planning element	Model plan
Setting	A secondary school in Karachi during a two-week science exhibition project.

studysapiens.com

Planning element	Model plan
Characters	Zara, a confident city student, and Hira, a thoughtful new student from a remote village school.
Conflict	Zara initially mistakes Hira's quietness for lack of ability; Hira assumes Zara will dismiss her experience.
Plot	Uneasy pairing → failed model → honest exchange → combined skills → successful presentation.
Theme / required words	Diverse experience can create a bond, cohesion and harmony when people listen respectfully.

Model story — The Model That Would Not Stand

• When Zara was paired with Hira for the science exhibition, she tried to hide her disappointment. Zara had lived in Karachi all her life and enjoyed leading every group. Hira had recently arrived from a small village school and spoke only after careful thought. Their backgrounds seemed so diverse that Zara expected their project to end in confusion.

• At first, Zara made every decision. She designed a tall windmill model without asking Hira's opinion, but its tower collapsed during the first test. "Perhaps the base needs a wider support," Hira said quietly. Zara almost objected, then noticed Hira sketching triangles that she had once used to support a water tank near her home. For the first time, Zara listened instead of interrupting.

• They rebuilt the base together. Zara improved the presentation, while Hira tested the structure and explained each practical choice. Meanwhile, they shared stories about their schools and discovered that both had feared being judged. Their initial discomfort developed into a bond based on trust. Each girl's contribution filled a gap in the other's approach, creating cohesion in the team.

• On exhibition day, the windmill stood firmly, but the judges praised more than the model. They noted the harmony with which the students answered questions and credited each other. Zara and Hira did not win first prize, yet they left with something more lasting: an unexpected friendship and the understanding that difference becomes valuable when respect replaces assumption.

Review: The beginning establishes setting and characters; the middle presents a conflict and turning point; the end resolves it and states the theme through action. *Meanwhile* links the middle stage, while repeated references to listening create cohesion among paragraphs.

Review 1 • Units 1–6

This section solves the official three-page cumulative review placed after Unit 6. Answers are concise where a complete model already appears in the relevant unit.

Reading A. Answer the cumulative questions.

1. How does the Unit 1 author view the pre-Islamic Arabs? Give evidence.

The view is balanced. The author admires their memory, eloquence and poetry, citing the Ukaz fair and Hammad's extraordinary recitation, but criticizes the ignorance, wrong beliefs, cruelty and injustice described in the wider society. The account therefore recognizes cultural achievement without overlooking the need for moral reform.

2. How can patriotism help people cooperate during disasters or pandemics?

Patriotism can turn concern for the homeland into practical solidarity. People may follow safety guidance, donate blood or supplies, protect public property and volunteer across social divisions. During a pandemic, responsible citizens can counter misinformation and care for vulnerable neighbours; during a disaster, coordinated rescue and relief put shared welfare above personal convenience.

3. How do the daffodils affect the poet initially and in later recollection?

Their immediate sight changes the poet's lonely wandering into delight as he watches their lively dance. Later, when he is vacant or pensive, their image flashes upon his inward eye. Memory then recreates companionship and pleasure, making solitude blissful as his heart dances with them.

4. Assess Hazrat Asma's (RA) contribution to the migration. What if she had not helped?

Her provisions supported the travellers, her resourcefulness secured supplies, her careful night journeys reduced detection and her silence protected their location. Without this support, food delivery and secrecy would have been more difficult and the risk of discovery or hardship greater. Her contribution was therefore practical, protective and morally significant.

5. How does entrepreneurship influence society beyond economic growth?

It can challenge stereotypes, widen leadership opportunities, provide education or healthcare solutions and inspire future generations. Community-focused ventures also build skills, confidence and networks. Responsible entrepreneurship can thus promote equality and social problem-solving, not merely income and production.

studysapiens.com

Vocabulary A. Dictionary information.

Word / pronunciation	Dictionary meaning	Part of speech
solitude /ˈsɒlɪtjuːd/	the state of being alone, often peacefully	noun
devotion /dɪˈvəʊʃən/	deep love, loyalty or dedicated commitment	noun
jocund /ˈdʒɒkənd/	cheerful and full of lively happiness	adjective
capture /ˈkæptʃə/	catch or seize; also the act of being caught	verb; noun
innovative /ˈɪnəvətɪv/	introducing or using new ideas and methods	adjective

Vocabulary B. Explain the highlighted words.

• **procrastinating:** delaying necessary work; **impart:** pass on knowledge or wisdom; **eagerly:** enthusiastically; **intently:** with concentrated attention; **approach:** a method of doing something.

Grammar A. Supply the indicated parts of speech; answers may vary.

1. Zeeshaan was feeling very **anxious** (adjective) about the upcoming test.

2. She **kicked** (verb) the ball and it flew across the field.

3. They went **outside** (adverb) to find their missing cat.

4. Wow (interjection)! That's a huge fish!

5. The **shelf** (noun) was filled with books and magazines.

Grammar B. Identify each tense.

1. will visit: simple future

2. was cooking: past continuous

3. have completed: present perfect

4. had already left: past perfect

5. had already left before I arrived: past perfect (the second sentence repeats the form).

Grammar C. Identify gerund, infinitive or participle.

1. Walking in the park relaxes me — gerund, acting as subject.

2. The **broken** window needs to be fixed — past participle used adjectivally.

3. She heard the **crying** baby — present participle describing the baby.

4. They want **to visit** the museum — to-infinitive.

studysapiens.com

Grammar D. Correct the punctuation.

1. Zeeshan and Kiran went to the market. They bought fruits, vegetables and bread.

2. It’s raining outside. Don’t forget your umbrella.

3. She said, “I’ll meet you at the café.”

4. “Where is the library?” he asked.

5. The book’s cover was torn, but the pages were intact.

Grammar E. Write 4–5 sentences using at least three transitions.

Model paragraph — A reading goal

• I want to build a consistent reading habit this term. **First**, I will read for twenty minutes before using my phone in the evening. **In addition**, I will keep a short list of unfamiliar words and review it each weekend. **However**, if schoolwork becomes unusually demanding, I will adjust the target rather than abandon it. **Therefore**, my plan will remain both challenging and realistic.

Oral A. School-assembly role-play on self-discipline.

Model role-play

• **Class representative:** “Today’s assembly focuses on self-discipline. How can we help students turn good intentions into regular action?”
• **Student:** “I postpone homework until late at night and then become distracted by my phone. What should I change?”
• **School counsellor:** “Begin with one manageable rule: complete your first priority before entertainment. Keep the phone outside the study area and review your progress weekly.”
• **School principal:** “Our study-skills sessions and mentor groups can support you. Self-discipline also includes sleep, punctuality and asking for help before a difficulty becomes overwhelming.”
• **Class representative:** “We can form accountability pairs and share practical strategies without shaming anyone. Improvement should be measured against our own previous habits.”
• **Student:** “I will try a five-day plan and report which adjustment helps most.”

Oral B. Debate: “The Role of Youth in Nation-Building”.

Concise debate response

• Youth contribute through education, ethical work, innovation and service, but they should not be expected to solve national problems alone. Governments and institutions must provide fair opportunities and responsible leadership. A young person can begin locally by learning a useful skill, rejecting misinformation and serving the community. When critics say that small actions are insignificant, we can answer that durable national change depends on millions of responsible daily choices supported by just systems.

Writing A. Describe respect for someone very different and its effect.

Model response

• When Bilal met a classmate whose family traditions and opinions differed greatly from his own, he initially avoided conversation. During a group task, however, he listened without interrupting, asked respectful questions and used the student's preferred pronunciation of her name. He did not have to agree with every view; he only needed to recognize her dignity and sincerity. In return, she became more willing to understand his perspective. Their respect reduced suspicion, improved cooperation and transformed a cautious relationship into one based on trust.

Writing B. Narrate a character's journey to fight for justice.

Model narrative — Fair Water for Every Street

• In Mohsin's neighbourhood, a new water timetable supplied the main road generously but left two narrower streets with only an hour of water each day. When residents complained individually, they received vague promises. Mohsin's first attempt to challenge the arrangement also failed because he had only anger, not evidence.

• Instead of giving up, he asked each household to record actual supply times for two weeks. He photographed the public timetable, listened to the valve operator and discovered that an undocumented diversion favoured the main road. Some neighbours feared conflict and urged him to remain silent, but he presented the records calmly at the community meeting.

• The evidence changed the discussion. A residents' committee verified the findings and arranged a transparent rotation with independent monitoring. Mohsin learned that justice required more than accusation: it required patience, accurate facts, courage and a workable remedy. The obstacles had slowed him, but they had also taught him how to turn protest into lasting reform.

Original Exam-Practice MCQs

1. Taseer's main flaw was:

(a) unkindness (b) procrastination
(c) dishonesty (d) pride in grades

Answer: (b) procrastination — He delayed important tasks despite good intentions.

2. Which is a "big rock" in the story?

(a) aimless scrolling (b) schoolwork
(c) trivial chatter (d) daydreaming

Answer: (b) schoolwork — Schoolwork is a major responsibility.

3. Why did the first jar arrangement fail?

(a) the jar disappeared
(b) small materials occupied space first
(c) there were no rocks
(d) the sand became water

Answer: (b) small materials occupied space first — Sand and pebbles left insufficient room for big rocks.

4. The climax occurs when Taseer:

(a) understands and accepts the priority lesson
(b) first plays a game
(c) falls asleep in class
(d) moves away

Answer: (a) understands and accepts the priority lesson — This is the decisive change in perspective.

5. “Intently” most nearly means:

(a) carelessly
(b) with full attention
(c) reluctantly
(d) loudly

Answer: (b) with full attention — The classmates concentrated on Taseer’s account.

6. Which is a subordinating conjunction?

(a) but
(b) because
(c) and
(d) or

Answer: (b) because — Because introduces a dependent reason clause.

7. Which pair is correlative?

(a) either/or
(b) but/so
(c) and/but
(d) if/because

Answer: (a) either/or — Either and or work together.

8. “Therefore” commonly signals:

(a) contrast
(b) result
(c) time
(d) choice

Answer: (b) result — It introduces a consequence.

9. The resolution of a story:

(a) introduces the setting only
(b) shows how the conflict is resolved
(c) lists synonyms
(d) removes the theme

Answer: (b) shows how the conflict is resolved — It settles the central problem and reveals outcomes.

studysapiens.com

10. Cohesion in writing means:

(a) ideas connect logically (b) every sentence rhymes
(c) no transitions are used (d) characters share one background

Answer: (a) ideas connect logically — Transitions and clear development help the text hold together.

Points to Remember

Jar lesson: schedule major responsibilities first, then fit secondary and trivial activities around them.

Change requires: a clear model, a realistic schedule, practice and determination.

Plot: exposition → rising action → climax/turning point → falling action → resolution.

Coordinating: FANBOYS; **subordinating:** because/although/unless; **correlative:** paired connectors.

Transitions clarify addition, contrast, sequence and result across ideas.

Story writing needs setting, characters, conflict, a turning point, resolution and theme.

Review 1 revisits Units 1–6 through comprehension, dictionary work, grammar, speaking and writing.

MCQ key at a glance

Q	Key	Q	Key	Q	Key	Q	Key	Q	Key
1	b	2	b	3	b	4	a	5	b
6	b	7	a	8	b	9	b	10	a

How to attempt this unit in the paper

- For plot questions, explain how each stage advances the conflict and theme rather than retelling without labels.
- For the jar analogy, define every object and connect it to a real priority.
- Check whether a conjunction shows equal rank, dependence or a paired relationship.
- Use a semicolon correctly before an independent-clause transition such as “therefore” and place a comma after it.
- In cumulative answers, name the relevant unit’s evidence but keep the response focused on the new question.

studysapiens.com
