English • Global connections, critical literacy and précis

Impact of Globalisation

Culture and Economy • Official activities • Anagrams • Sentence structure • Four précis models

Unit 8 • Complete official activities • Culture + Economy + Sentence Structure + Précis

Text at a glance

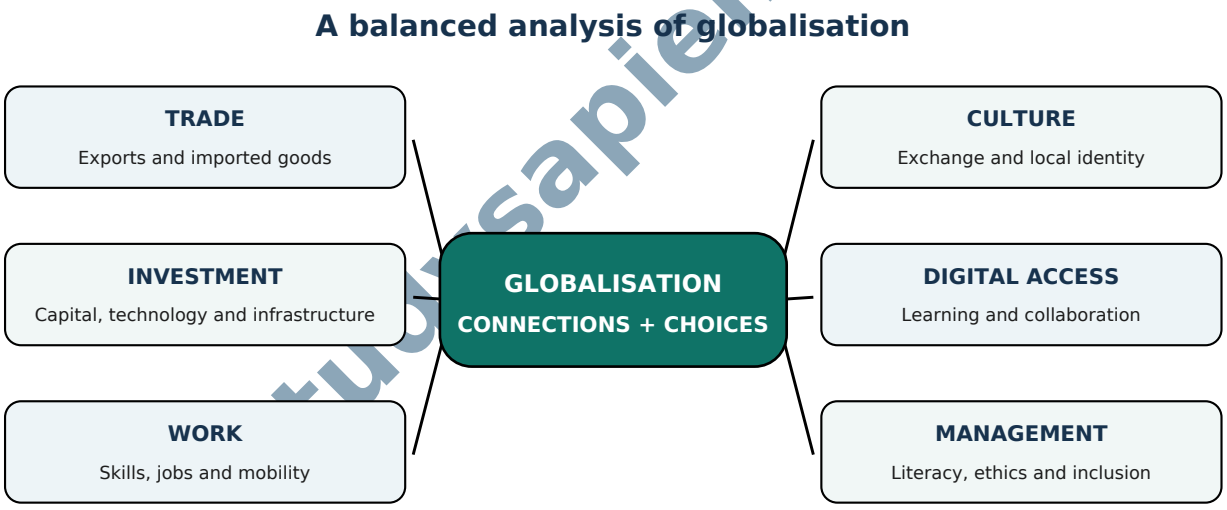

• **Globalisation:** The growing interconnection and interdependence of countries, economies and cultures through communication, trade, technology, investment and exchange of ideas.

• **Economic effects:** Wider export markets, imported goods, foreign investment, infrastructure, industrial expansion and skilled employment—alongside competition and inequality.

• **Cultural effects:** Greater access to information, languages, education and diverse perspectives, balanced against misinformation, homogenisation and pressure on local traditions.

• **Language focus:** Glossary use, anagrams, simple and complex sentence structure, oral exchange and objective précis writing.

Figure 1 — Original benefits-and-responsibilities map

Main idea in the centre → supporting details → examples → a clear concluding sentence

Core judgement: Globalisation is not presented as wholly beneficial or wholly harmful. Its outcomes depend on policy, access, skills, ethical standards and the ability to preserve local identity while engaging with the wider world.

Pre-Reading and While-Reading

P1. What do you understand by globalisation?

Globalisation is the process through which people, markets, governments and cultures become increasingly linked across national boundaries. Trade, transport, migration, digital communication and shared ideas allow an event or trend in one place to affect people elsewhere. It creates interdependence, meaning that countries both influence and depend on one another.

P2. How does globalisation influence culture and economy?

Economically, it can expand exports, investment, technology transfer and employment while exposing local firms to stronger competition. Culturally, it can broaden access to languages, food, fashion, knowledge and viewpoints, but may also overshadow local practices. A strong response considers both opportunities and risks instead of assuming one uniform effect.

P3. Give examples of effects on daily life.

Daily examples include wearing internationally influenced clothing, using a smartphone designed through global supply chains, learning from an online course, video-calling someone abroad and buying imported food. Pakistani textiles, rice and sports goods reaching foreign markets show the outward direction of the same exchange.

Margin questions. Quick answers in passage order.

Question	Answer
What does “digital globalisation” refer to?	Cross-border interconnection created or accelerated through digital communication, online information, platforms and collaboration.
How does globalisation facilitate labour mobility?	International companies, wider labour markets and demand for advanced skills can create opportunities beyond a worker’s immediate locality; digital systems can also support cross-border collaboration. Skills, visas, fair recruitment and worker protections affect who can benefit.
How does globalisation contribute to cultural exchange?	Media, social platforms, language tools and online interaction let people share daily life, celebrations, values and challenges, encouraging familiarity and empathy.

Question	Answer
What educational opportunities does digital globalisation create?	Online courses, webinars, virtual classrooms, international educators, digital libraries and collaborative projects make learning available beyond a local classroom.

Reading and Critical Thinking

A. Answer the following questions.

1. What is globalisation, and how does it promote economic growth?

Globalisation is the integration of economies, cultures and technologies through increased trade, communication and exchange. It promotes growth by opening export markets, attracting investment, spreading technology and expanding industries. These activities can increase production, infrastructure and employment, although fair distribution and protection for vulnerable businesses remain important.

2. How has globalisation affected Pakistan's trade and investment?

Pakistani textiles, agricultural products and sports goods can reach international buyers, while consumers and industries gain access to imported goods and inputs. Foreign direct investment, including the passage's CPEC example, can supply capital, technology, jobs and infrastructure. These benefits must be managed alongside debt, competition, local capacity and economic stability.

3. What new job opportunities have resulted in Pakistan?

Multinational operations and industrial expansion create work in information technology, telecommunications and manufacturing, as well as supporting services. Demand for people who can operate advanced systems can improve prospects and wages for skilled workers. Education and vocational training are necessary to make these opportunities broadly accessible.

4. What is cultural exchange, and how does it benefit people?

Cultural exchange is the sharing of ideas, customs, languages, art, food and everyday experiences among different communities. It broadens knowledge, encourages empathy and helps people appreciate diversity. Language learning and direct interaction can deepen understanding by revealing the values and literature behind another culture rather than relying only on stereotypes.

studysapiens.com

5. What concerns arise about preserving traditional Pakistani culture?

Global trends may overshadow local languages, customs, dress and heritage, creating pressure towards cultural sameness. The concern is not exposure to other cultures itself but the possible loss of distinctive practices. Pakistan can respond by documenting traditions, supporting local artists and content, teaching languages and choosing global influences selectively rather than rejecting exchange.

6. How has globalisation expanded students' access to information?

Websites, videos, online articles and virtual classrooms provide almost immediate access to material from around the world. Language apps and dictionaries assist comprehension, while international educators and digital courses offer subjects that may not be locally available. Students must nevertheless evaluate sources because rapid access also spreads misinformation and overload.

7. How does learning about diverse perspectives benefit students?

It helps students question assumptions, compare evidence and understand that people may interpret the same issue differently because of history or circumstances. Such learning develops empathy, intercultural communication and critical thinking. These abilities prepare students to collaborate respectfully and to solve problems without treating one viewpoint as universally complete.

8. How can understanding globalisation help young Pakistanis contribute to the country's future?

It enables students to recognize export and technology opportunities, prepare for skilled work and represent Pakistani culture confidently online. It also encourages them to evaluate misinformation, support local content and consider unequal access. With this balanced understanding, young people can participate globally while protecting cultural identity, economic stability and social inclusion.

studysapiens.com

B. Choose the correct options.

Q	Answer and evidence
1	(b) enhanced connectivity and interdependence
2	(c) by opening international markets for exports
3	(c) by facilitating easier language learning
4	(c) erosion of traditional Pakistani culture
5	(c) by enabling instant global communication

Q	Answer and evidence
6	(a) promoting digital literacy and supporting local content
7	(b) finding a balance between global benefits and Pakistan's cultural identity and economic stability

Concise unit summary

• Globalisation links Pakistan with international markets, investment, technologies and cultures. It supports exports, infrastructure, industry and skilled employment while giving consumers and students wider access to goods and knowledge. Digital platforms encourage cultural exchange, language learning and global collaboration. However, international competition, misinformation, inequality and pressure on traditional culture require careful management. Digital literacy, ethical standards, local content and reduced digital inequality can help Pakistan gain from global connections without sacrificing economic stability or cultural identity.

Vocabulary: Glossary in Use and Anagrams

A. Use the glossary words in original sentences.

1. Appreciate / empathy: Listening carefully helps us appreciate another person's experience and respond with empathy.

2. Communication / misinformation: Clear communication reduces confusion, but misinformation can spread just as quickly online.

3. Complexities / crucial: Understanding the complexities of trade is crucial before judging its effects.

4. Economy / trade / wages: Fair trade can strengthen the economy, while safe employment and reasonable wages support workers.

5. Erosion / preserve / tradition: We can prevent cultural erosion if we preserve each living tradition through practice and teaching.

6. Globalisation / interconnected / integration: Globalisation makes societies interconnected through the integration of markets and communication.

7. Harness / technology: Schools should harness technology for learning rather than allow it to become a distraction.

8. Homogenisation: Cultural homogenisation may reduce diversity if local voices receive little visibility.

9. Opportunities: Online courses create opportunities for students in remote areas.

studysapiens

B. Make words from the given letters; banks below are verified but not exhaustive.

Source word	Valid examples (letters may be rearranged but not added)
globalisation	global, globalist, isolation, abolition, obligation, boasting, sailing, listing, bolting, booting, boat, boats, boast, boost, stool, tools, goal, goals, giant, giants, align, snail, slain, salt, soil, lion, lions, into, onto, bolt, bolts, lost, slot, slit, tail, tails, nail, nails, gain, gains, sign, sing, song, long, along, last, list, oil, oils
integration	integration, iterating, treating, rotating, training, granite, ingrate, nation, ration, region, ignore, ornate, great, treat, train, grain, giant, grate, grit, ring, ringtone, tinge, tiger, irate, ratio, rain, rant, rating, gain, gait, into, note, tone, torn, tore, tire, tier, rite, gate, gear, near, neat, earn, iron
information	information, formation, motion, notion, nation, ration, ratio, format, inform, minor, train, front, moon, room, roof, foot, font, fair, farm, form, from, iron, into, onto, mint, mini, main, rain, fiat, foam
homogenisation	home, homes, homage, hostage, hostname, night, nights, things, sight, eight, heating, hosting, soothing, mooting, moaning, meaning, mashing, mating, eating, seating, homing, honest, onset, stone, notes, notion, motion, nation, moist, some, same, seam, team, meat, mate, time, item, emit, omit, into, onto, nose, ones, shoe, shone, shoot, smooth, soothe, goose
communication	communication, communion, amount, account, mount, count, common, nation, action, auction, caution, motion, notion, union, onion, canton, cannot, canon, commit, comic, ionic, icon, coin, into, onto, unit, unto, main, moan, moat, coat, atom, mint, mini, manic, antic, cation, actin

Do not reuse a letter more times than it occurs in the source word. The lists deliberately include shorter and longer words; many additional valid formations exist.

Grammar: Simple and Complex Sentences

A. Identify subjects, verbs and objects in the museum paragraph.

Sentence part	Subject	Verb(s)	Object / complement
Yesterday, Zaaraa and her friends visited …	Zaaraa and her friends	visited	the new museum in town
They explored … and learned …	They	explored; learned	various exhibits; *about ancient civilizations* is a prepositional phrase, not a direct object
The tour guide explained …	The tour guide	explained	the history of each artifact
Afterward, Zaaraa bought …	Zaaraa	bought	a souvenir
Her friends admired …	Her friends	admired	the beautiful paintings and sculptures
Everyone enjoyed … and promised …	Everyone	enjoyed; promised	the visit; *to return soon* is an infinitive complement

Underline each complete subject once and each finite verb twice. Circle only true direct objects in the strict analysis; keep prepositional phrases separate.

B. Identify complex sentences and underline subordinate clauses.

Sentence / clause	Analysis
I woke up early … **because the sunlight was streaming through my window**.	Complex; the bold because-clause is dependent.
After rubbing the sleep from my eyes, I decided to go for jogging …	Simple in the finite-clause sense; “After rubbing …” is a non-finite introductory phrase.
Despite the chilly breeze, I enjoyed the fresh air …	Simple; “Despite …” is a prepositional phrase.

Sentence / clause	Analysis
While running, I saw my friend Zaaraa, **who waved and joined me …**	Complex; “While running” is a reduced subordinate clause and “who …” is a relative clause.
Because we both love exercising outdoors, we often meet up …	Complex; the because-clause is dependent.
After our jog, we sat … and talked …	Simple with a compound predicate.
Although it was still early, the park was bustling …, and children were playing …	Complex; the although-clause depends on a compound independent structure.
Finally, we said goodbye and promised to meet again.	Simple with a compound predicate.

C. Write at least five complex sentences and label the clauses.

1. Although the rain was heavy (dependent), we continued our journey (independent).

2. I will join the webinar (independent) **if my internet connection remains stable** (dependent).

3. When the bell rang (dependent), the students submitted their work (independent).

4. We visited the cultural centre (independent) **because we wanted to learn about local crafts** (dependent).

5. The researcher checked every source (independent) **before she published the article** (dependent).

6. Since digital access is unequal (dependent), schools should provide offline materials too (independent).

studysapiens.com

Oral Communication Skills

A. Ask and answer personal questions from the mind map.

Model pair responses

• **Favourite hobby:** “My favourite hobby is photography because it trains me to notice details and preserves ordinary moments.”
Is a hobby good? “Yes. A balanced hobby develops skills and relaxation, provided it does not displace sleep or responsibilities.”
• **Family members:** “There are five members in my family: my parents, my two siblings and I.”
Special occasions: “We prepare a meal, share gifts or cards and spend time with relatives. Everyone helps with a small task.”
• **School:** “My school is Model Public School, Karachi.” (Replace this model name with your own.)
Favourite teacher: “My favourite teacher is my English teacher because she explains difficult ideas clearly and gives respectful, specific feedback.”

B. Reflect on digital globalisation and personal cultural understanding.

Model reflection

• Digital globalisation has made other cultures more immediate to me. Through a virtual classroom exchange, I learned how students in another country organize their school day and celebrate a national festival. The experience corrected my assumption that one short video could represent an entire culture. I now compare several sources and ask respectful questions before drawing conclusions. Online access has increased my curiosity and empathy, but it has also taught me to check context, protect my privacy and avoid treating every viral post as reliable information.

Writing Skills: Précis

Method. Read → identify thesis and main points → remove examples/repetition → use objective third-person prose → preserve sequence → revise → add a title.

A. Reduce each passage to approximately one-third and supply a suitable title.

1. Renewable Energy: Promise and Challenges

• Renewable energy is vital for tackling climate change because it is sustainable and less polluting than fossil fuels. Investment supports emissions reduction, but high initial costs and inadequate storage challenge reliable adoption.

2. Protecting Nature for Future Generations

• Nature sustains life through clean air, water and fertile soil, while its diverse landscapes and seasons provide beauty, inspiration and mental renewal. To preserve these benefits for future generations, people must reduce pollution, conserve habitats and adopt sustainable practices.

3. Education as the Foundation of Progress

• Education advances society by developing knowledge, skills and critical thinking. It improves employment and reduces poverty, promotes tolerance and cooperation, and empowers people to make informed choices, achieve goals and contribute to innovation and cultural enrichment.

4. Healthy Eating for a Better Life

• A balanced, varied diet supplies nutrients needed for energy, immunity and metabolism and helps prevent chronic disease. Limiting sugar, salt and unhealthy fats supports physical health and mental stability, whereas poor choices increase risks of obesity, diabetes and heart disease.

Précis check: These models retain the original sequence and qualifications without copying descriptive lists or adding opinions. Word counts may vary slightly while remaining close to one-third; meaning, coherence and objectivity matter more than an identical count.

Original Exam-Practice MCQs

1. Interdependence means countries:

(a) never interact
(b) affect and depend on one another
(c) share one culture only
(d) avoid trade

Answer: (b) affect and depend on one another — Global connections create mutual influence and reliance.

2. Which is a Pakistani export named in the text?

(a) textiles
(b) crude oil only
(c) aircraft
(d) coffee only

Answer: (a) textiles — Textiles, rice and sports goods are named.

3. Foreign direct investment can bring:

(a) capital and technology
(b) cultural isolation only
(c) fewer skills
(d) closed markets

Answer: (a) capital and technology — It can support industry, jobs and infrastructure.

4. Cultural homogenisation is the process of:

(a) making cultures more similar
(b) preserving every language
(c) increasing local diversity
(d) banning communication

Answer: (a) making cultures more similar — It can threaten distinctive traditions.

studysapiens.com

5. The digital divide refers to:

(a) unequal access to digital technology
(b) two social-media accounts
(c) a language exercise
(d) a balanced diet

Answer: (a) unequal access to digital technology — Connectivity and resources are unevenly distributed.

6. Which is the best response to online misinformation?

(a) share immediately
(b) verify sources and context
(c) reject all global media
(d) believe the longest post

Answer: (b) verify sources and context — Digital literacy requires critical evaluation.

7. A simple sentence must contain:

(a) at least two dependent clauses
(b) one independent clause
(c) no finite verb
(d) a conjunction

Answer: (b) one independent clause — It expresses one independent complete thought.

8. “Because it was raining” is:

(a) an independent clause
(b) a dependent clause
(c) a direct object
(d) a complete simple sentence

Answer: (b) a dependent clause — It cannot stand alone in this structure.

9. A précis should normally be:

(a) objective and concise
(b) longer than the original
(c) full of personal opinions
(d) a list of copied sentences

Answer: (a) objective and concise — It condenses essential meaning accurately.

10. The best title for a précis should:

(a) capture its central idea
(b) introduce an unrelated topic
(c) be a complete paragraph
(d) name every example

Answer: (a) capture its central idea — A suitable title reflects the passage’s main focus.

studysapiens.com

Points to Remember

Globalisation: interconnection + interdependence through trade, communication, technology and ideas.

Economic balance: exports, investment and skills versus competition, unequal benefits and stability concerns.

Cultural balance: exchange and empathy versus homogenisation, misinformation and erosion of local traditions.

Simple sentence: one independent clause; **complex sentence:** an independent clause plus at least one dependent clause.

Phrases such as “Despite the rain” should not automatically be labelled subordinate clauses.

Anagram rule: use only available letters and respect each letter’s frequency.

Précis: title + objective third-person condensation + original sequence + no added opinion.

MCQ key at a glance

Q	Key	Q	Key	Q	Key	Q	Key	Q	Key
1	b	2	a	3	a	4	a	5	a
6	b	7	b	8	b	9	a	10	a

How to attempt this unit in the paper

• For globalisation answers, present both an opportunity and a condition or risk when the question asks for assessment.
• For subject-verb-object analysis, separate prepositional objects from direct objects.
• Look for a finite subject-verb structure when deciding whether a group of words is a clause.
• For anagrams, write the source letters and cross them off mentally to avoid accidental repetition.
• For précis, remove examples first, then compress wording without deleting important qualifications such as costs or challenges.
